Welcome

This template is designed for Beamer slides built from R Markdown.

It follows a Bielefeld University / Empirical Methods theme.

Feel free to use it at your own risk.

► Details

■ Idea:

- keep main message here
- move technical detail to appendix

■ You can also click the topleft logo to jump to appendix

Scenario	Cost	Impact
Baseline	100	
Pilot	115	+6 %
Target	120	+10 %

R Code and Output

```
starwars |>  
  select(name, species, homeworld) |>  
  print(n = 3)
```

```
## # A tibble: 87 x 3  
##   name          species homeworld  
##   <chr>         <chr>   <chr>  
## 1 Luke Skywalker Human    Tatooine  
## 2 C-3PO         Droid    Tatooine  
## 3 R2-D2         Droid    Naboo  
## # i 84 more rows
```

Math and Footnotes

You can use $\LaTeX$ equations:¹

$$\hat{\beta} = (X^T X)^{-1} X^T y, \quad E(Y | X) = X\beta$$

You can use inline math too, e.g. $\alpha \in \mathbb{R}$.

¹The expectation operator E is a makro, see the file `theme/commands.tex` for more.

Quotes and Blocks

"Without data, you're just another person with an opinion." – W. Edwards Deming

Title

Use for neutral structure.

Title

Use for examples or recommended actions.

Title

Use for caveats.

3 Appendix

Appendix

The start of the backup slides. You can provide an overview here:

Column details

More details on columns

If you want to use lists within columns, you need to explicitly use the `itemize` environment:

- this
- works
- well

- this - does - not - work

▶ Return

Thanks for your attention!
